APPLICATION/FUNCTION

19" lab racks are freely accessible from all sides. Subracks, 19" cases and 19" shelves can be mounted. Two angled steel uprights are screw-fixed on the base part (mobile base/plinth and base plate respectively). The 19" cut-outs of the steel uprights are recessed so far that a flat surface for front panels is created. At the top, the two profiles are connected by a cover plate which gives the rack additional stability.

The base/plinth of the mobile 19" lab rack has two fixed rear castors and two locking castors at the front. The 100 mm roller diameter ensures both good mobility and high stability.

A base plate from sheet steel forms the plinth for the stationary 19" lab rack.
