- 10-Finger-Multi Touch Capacitive Touch Panel
- VESA 100 mounting
- 2 years guarantee

Due to its characteristics, such as vandalism-resistance and high visibility in direct sunlight, faytech's IP65 High Brightness Touch PCs are designed for applications in demanding environments, especially outdoor or environments with excessive humidity or dust.

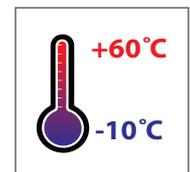

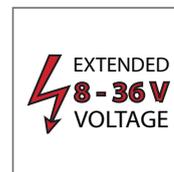

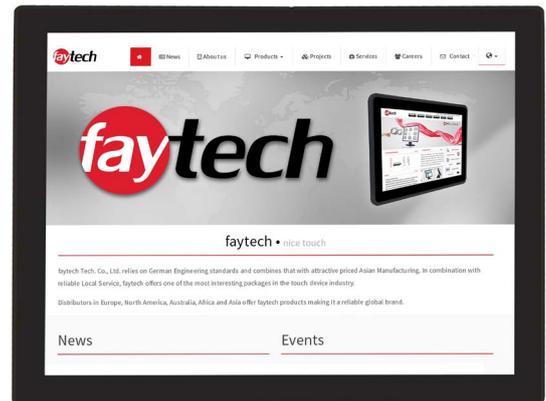

High brightness LEDs with extremely long working time, coupled with special films and enhanced polarizers allow a perfect picture even at extremely bright environmental conditions.

The individually equipped, water- and dust-resistant, stable connectors ensure that the connectivity can withstand all harsh weather conditions.

The series are equipped with our renowned fay-002 or fay-003 mainboard, reliable RAM, SSD and WLAN modules. A preinstalled Linux Ubuntu OS makes the fanless and rugged device work directly out of the box.

The high-strength safety glass protects the models from vandalism, neither a knife nor a screwdriver would leave a scratch on the surface.

IP65 HB Touch PCs are always your best choice in the most demanding environments.
